

quick-mix 

Data Facts

An **idea** prevails!

quick-mix is the brand of choice for dry mortar, plaster, thermal insulation composite systems, and construction chemical products.

The success story began back in 1967 with a forward-looking, groundbreaking principle for the construction industry: mortar + water = done! Based on this principle, we have built a corporate strategy, which offers considerably more than “just” dry mortar.

quick-mix is part of the Sievert Group located in Osnabrück, Germany, which operates as the holding and management company for affiliates in five different sectors of the construction industry:

- **ready-mixed concrete**
- **construction elements**
- **construction chemicals**
- **logistics**
- **dry mortar**

The quick-mix thermal insulation composite system turns every facade into a gain!

quick-mix 

We support craftsmen and planners through:
initial and advanced training courses, consulting and on-site service.

Realising **innovations** in mass production!

- **Risk-free masonry works**

Do you need to lay bricks and execute joints in a single operation. This is not a problem with quick-mix V.O.R. masonry mortar. The product specifications are specially adjusted to the water suction characteristics of the different brick types and offer a maximum level of safety against efflorescence.

- **High-tech for the house wall**

Our quick-mix fibre technology sets new standards. Enhanced light plasters and plaster coatings for thermal insulation composite systems minimise the risk of cracks and meet extreme requirements.

- **Instantly ready**

quick-mix “instantly ready concrete” is a rapid-hardening, versatile concrete for indoors and outdoors. For quick fixing of fence posts, rotary clothes driers, signs, etc. as well as for building small foundations. No mixing required. Just add water – done in an instant!
